Professional Summary

- Backend Developer with 1+ years of experience building REST APIs and microservices using Java and Spring Boot. Experienced with Spring Security, Hibernate, Spring Data JPA, MySQL, JWT authentication, database-driven applications, debugging, testing, and CI/CD workflows. Working knowledge of Python, LLMs, Prompt Engineering, and Retrieval-Augmented Generation (RAG), applied in building AI-powered application features.

Education

- **Vel Tech Rangarajan DR.Sagunthala R&D Institute of Science and Technology** — Chennai, TN
  Bachelor of Technology - Computer Science Engineering - CGPA: 8.62 — *2020 - 2024*

Technical Skills

- **Languages**: Java, Python, SQL
- **Backend Technologies**: Spring Boot, Spring Security, Hibernate, Spring Data JPA, REST APIs, Microservices
- **AI & Generative AI**: Generative AI, Prompt Engineering, Large Language Models (LLMs), Retrieval Augmented Generation (RAG), Vector Databases, GitHub Copilot, Claude AI
- **Databases**: MySQL
- **Cloud & DevOps**: Docker, Jenkins, CI/CD, Google Cloud Platform (GCP)
- **Tools**: Git, GitHub, Postman, Swagger, VS Code, Eclipse
- **Concepts**: OOP, Data Structures, Algorithms, Microservices Architecture
- **Soft Skills**: Teamwork, Communication, Adaptability, Time Management

Experience

- **Wipro - Developer** — Jan 2025 – Present
  Wipro Limited — *Hyderabad*
  - Designed and developed REST APIs using Java and Spring Boot for core backend modules.
  - Implemented database-driven CRUD operations using MySQL and Spring Data JPA.
  - Developed secure authentication and authorization mechanisms using Spring Security and JWT.
  - Utilized ModelMapper for DTO-to-Entity conversion and implemented centralized exception handling using a Global Exception Handler.
  - Collaborated with frontend teams to integrate backend APIs, ensuring reliable and consistent data exchange.
  - Contributed to debugging, testing, and CI/CD workflows to support timely feature delivery.

Projects

- **FitAI - AI Powered Fitness Platform**:

  Developed an AI-powered fitness platform using Spring Boot, React, Python and FastAPI. Designed backend APIs for workout and nutrition management using Spring Boot and MySQL. Integrated Generative AI capabilities to provide intelligent fitness guidance and personalized recommendations. Applied prompt engineering concepts and explored Large Language Model (LLM) integration to enhance user experience. Followed a modular architecture enabling future support for Retrieval Augmented Generation (RAG) based features. *April 2026*

- **Blog Application**:

  Developed a full-stack Blog Management System using Java, Spring Boot, Spring Security, MySQL, and Spring Data JPA. Implemented JWT-based authentication and authorization for secure user access. Built functionality for creating, updating, deleting, and viewing blog posts and comments. Implemented centralized exception handling and object mapping using Global Exception Handler and ModelMapper. *March 2025*

- **Data Driven Trip Optimization & Route Planning**:

  Built a route optimization solution using Python and the Open Route Service API. Utilized Google Cloud Platform (GCP) and BigQuery for cloud-based analytics. Created dashboards and reports using Power BI to visualize business and route performance insights. *June 2024*

Achievements and Extracurricular Activities

- **SME at Chegg India Pvt. Ltd (EdTech Co.)**:

  Answered Computer Science questions and provided technical solutions as a Subject Matter Expert.

Certifications

- **AWS Cloud Practitioner** : AWS — Oct 2026
- **IBM App Connect Enterprise v12.0**: IBM — May 2025
- **Gen AI for Beginners**: Udemy — May 2025
- **GitHub Copilot: The Complete Guide**: Udemy — April 2025
- **Introduction to Industry 4.0 and Industrial Internet of Things**: NPTEL — October 2023
